

Andrii Stavskyi

Full-Stack Developer

✉ an.stawski@outlook.com ☎ [+380730929621](tel:+380730929621) 📍 Zviahel, Ukraine 🌐 [Website](#) 🔗 [Linkedin](#) 🐙 [Github](#)

Summary

Frontend-oriented Full-Stack Developer dedicated to building robust, minimalist web applications and high-performance tooling. Proficient in architecting complex systems using React, TypeScript, and .NET, with hands-on experience implementing real-time synchronization (SignalR), local-first storage (IndexedDB), and Feature-Sliced Design. Experienced in delivering end-to-end features - from clean, reusable UI components to secure backend administrative modules. Passionate about developer experience (DX) and modern, fast runtimes.

Experience

SoftServe

Remote

Jan 2026 - Jun 2026

Frontend Developer (University Practice)

Jan 2026 – Feb 2026

Led frontend development for a Cinema Management SPA using React and TypeScript, integrating with an ASP.NET Core API as part of an Ostroh Academy practice program. Engineered a real-time seat selection component and an interactive cinema hall builder. Implemented secure authentication and protected routes within the client application. Acted as Team Lead, managing Git Flow, conducting code reviews, and distributing tasks to ensure code quality and project momentum.

Full-Stack Developer Intern

Mar 2026 – Jun 2026

Took ownership of the 'Home' and 'Company Profile' administrative modules for the *Victory Center* project, delivering features across the entire stack. Designed backend endpoints using C# and .NET 9, leveraging CQRS/MediatR for clean separation of commands and queries. Implemented frontend solutions in React and TypeScript, handling complex state synchronization and form validation. Successfully resolved architectural and merge conflicts, refining project configurations to optimize the development workflow.

Education

National University "Ostroh Academy"

Bachelor's

Computer Science

Sep 2023 - Present

Selected Projects

Soliloquy | Astro, React, Dexie.js, Bun

Developed a privacy-centric, serverless note-taking application designed with a familiar messenger-style user interface. Engineered a 100% local-first data layer utilizing IndexedDB to ensure instant load times and complete data ownership without cloud dependencies. Built a highly optimized frontend architecture using Astro and React, powered by the Bun runtime for blazing-fast performance.

[Github](#)

Winup | TypeScript, Bun, CLI

Created a fast, interactive command-line wrapper for managing Windows package upgrades (winget) without visual noise. Implemented a safe-by-default upgrade flow that automatically filters out unverified package versions and handles system prompts gracefully.
